DETAILED ACTION

Response to Arguments/Remarks

1. Applicant's arguments see pages 12-13, filed on November 2, 2005, with respect to the objections and rejections of U.S.C. § 112 have been fully considered and are persuasive. The objections of claims 5, 9, 11, 12, 17, 21 and 22, and the rejections of claims 5, 10, 17-20 and 22 have been withdrawn.

Allowable Subject Matter

2. Claims 1-22 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims are allowable over prior art of record because the prior art of record does not teach or suggest, alone or in a combination, among other things, at least a synchronization establishing and tracking circuit and its method ms a whole, the combination of elements and features as claimed, which includes a phase determining circuit determining a first phase of the first spreading code sequence based on an added quasi-coherent signal which is the first and second quasi-coherent signals added together. The first spreading code sequence is correlated with the first quasi-coherent signal, and the second spreading code sequence is correlated with the second quasi-coherent signal as cited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
